

ULADZIMIR TREIHIS
AI Integration Developer

Warsaw, Poland | uladzimir.treihis.dev@gmail.com | treihis.com | [LinkedIn](#) | [GitHub](#)

- Yale-NUS Honours graduate in Mathematical, Computational & Statistical Sciences (GPA: 4.73/5).
- 3+ years of experience building full-stack applications with Python (Flask, FastAPI), TypeScript (React, Node.js), and cloud services (AWS, GCP).
- Delivered AI/ML projects including a RAG-based chatbot and a serverless document processing pipeline.
- Experience leading small teams, setting up GCP standards, and architecting secure applications from scratch.

EXPERIENCE

KEY TECH SOLUTIONS

Full Stack Developer (Contract)

Remote

07/2025 - present

- Engineered API and components for the dashboard interface of advertisements improving clients UX and KPI visibility.
- Built a reporting API that automated the generation and delivery of PDF reports via Slack and SendGrid, replacing a manual process and providing on-demand insights for the sales team.
- Refactored the primary ad-filtering system from single-select to a multi-filter component, improving user experience and enabling more complex ad campaign analysis.

FOREO

Full Stack Developer with AI (Internship)

Remote

03/2025 - 07/2025

- Architected and delivered a LLM-powered RAG chatbot using FastAPI and React to provide real-time product recommendations on the company's e-commerce site.
- Conducted iterative evaluation of RAG pipeline performance, testing embedding strategies, retrieval quality, and LLM response accuracy to improve chatbot reliability and recommendation precision.
- Promoted to an intern and project team lead role within one month; mentored 6 interns, managed task delegation, and established code quality standards.
- Took ownership of the company's GCP account, establishing infrastructure standards and documentation used for the chatbot and subsequent company projects.

CRIMSON EDUCATION

Web Development and AI Tutor (Part-time)

Singapore

01/2023 - 02/2025

- Developed a complete curriculum for new Frontend (React) and Backend (Node.js, FastAPI) and Data Science courses.
- Mentored and taught over 20 students, guiding them from zero programming knowledge to deploying their first full-stack web applications and predictive models.

YALE-NUS COLLEGE

Full Stack Developer (Part-time)

Singapore

05/2021 - 11/2022

- Architected and built a Flask web application for astrophysical research, featuring secure user authentication, Role-Based Access Control (RBAC), and complex data validation.
- Engineered a data submission flow with server-side validation for molecular line data files, ensuring data integrity for scientific analysis.

PROJECTS

Zusia.pl - AI tax assistant ([Project](#))

08/2024-11/2024

- Engineered the project end-to-end including pipeline for legal data collection and indexing, API, RAG and testing.
- Won the Civic Solutions Hackathon, gathering a team and securing further support.

This and other projects including parsers, bots, websites, and apps can be found at <https://treihis.com>

EDUCATION

YALE-NUS COLLEGE, NATIONAL UNIVERSITY OF SINGAPORE

Bachelor of Sciences with Highest Distinction (Mathematical, Computational & Statistical Sciences; GPA: 4.73/5)

Singapore

2020-2024

SKILLS

- **Programming languages:** Python, SQL, Typescript, JavaScript, Bash.
- **Frontend:** React, Next.js, React Native, Redux, HTML5, CSS3, MUI.
- **Backend:** Node.js, Express.js, Flask, FastAPI, GraphQL.
- **Databases:** PostgreSQL, SQLite, MongoDB.
- **AI / ML:** TensorFlow, RAG, PyTorch, Pandas, scikit-learn, LLM-API integration.
- **DevOps & Cloud:** AWS (EC2, S3, Lambda), GCP, Docker, Kubernetes, Git, GitHub Actions, CI/CD.
- **Languages:** Fluent in English, Polish, Belarusian, Spanish; limited proficiency in Ukrainian.
